EDUCATION

Kalinga Institute Of Industrial Technology

Bachelor of Technology - Electronics and Computer Science; GPA: 8.21

Bhubaneswar, Odisha

September 2022 - Present

Courses: Operating Systems, Data Structures, Optimization Techniques, Artificial Intelligence, Machine Learning, Cloud Computing

SKILLS SUMMARY

- **Languages:** HTML, CSS, Java Script, Next js, React js, Flask, Java, SQL
- **Platforms:** Linux, Windows, Solidworks, Autocad, Canva, Figma
- **Soft Skills:** Leadership, Management, Communication, Problem Solving, Critical Thinking, Team work, Social Work

CERTIFICATIONS

- Apna College - Data Structures and Algorithms
- Apna College - Full Stack Web Development
- AWS Academy - Cloud Foundations and Cloud Architecting
- Cursa - Backend Using Flask
- Microsoft Excel using AI tools

INTERNSHIP

- Summer Internship Training at OPGC (Odisha Power Generation Corporation)
- Prodigy Infotech (Web Development)

COMMUNITIES

- KIIT-TECHNOLOGY BUSINESS INCUBATOR - “Machine Learning Researcher ” August 2023 - Present

PROJECTS

- **Automated Question Predictor and Resume Generator**
Automated Question Predictor and Resume Generator is an AI-driven recruitment platform which uses ML and NLP to streamline hiring. It is developed with Flask, pdfminer for backend processing and HTML, CSS, and JavaScript for the frontend, it automates resume analysis and question generation, enhancing recruitment efficiency.
- **Expense Ease -- Android Application based Tracker:**
ExpenseEase is an Android application designed to help users track their expenses efficiently. It allows users to categorize their expenses, set budgets, and monitor their spending, providing a comprehensive overview of their financial activities.
- **Parkinson Disease Prediction using Machine Learning – Python:**
Parkinson's Disease Prediction using Machine Learning in Python is a model that has been created to identify the early signs of the disease. By analyzing medical data like voice recordings and motor symptoms, the model uses SVM algorithm to classify and predict the likelihood of Parkinson's, aiding in early diagnosis and treatment.
